TAB Encyclopaedia of Electronics for Technicians and Hobbyists

STAN GIBILISCO

- Covers virtually every aspect of hobby and consumer electronics, in an easily understandable language, whilst offering the right amount of detail, an abundance of illustrations and real world examples.
- Articles are arranged alphabetically by topic. To deliver deeper into a particular subject, extensive cross references point you to other related entries.
- Whether you choose a home security system, fixing telephones, polishing up your technical writing skills, obtaining your ham radio licence, training for a career and just fiddling for fun, you will find it in this book.

Audio Power Amplifier Design Handbook

SELF

- Compiled for professional designers, amateur enthusiasts, academic investigators and students
- Includes unique theory and practices of audio power amplifiers
- Supplies practical solutions to many intractable design problems
- The book includes the sources of power amplifier distortion, shows how they can be eliminated or minimised and gives detailed information allowing power amplifiers to be designed and constructed.

High Performance Audio Power Amplifiers

DUNCAN

- Comprehensive and colourful real-life guide
- Based on wide experience of audio and music technology
- Links analog electronics, acoustics, heat and music technology, high-end Hi-Fis and professional PA and recording studio use, theory, modelling and real-world practice design and repair
- This comprehensive guide to power amps is as a core reference for anyone in the industry and hobbyists.
