Black Conductive Rubber Wheel

- Statically conductive rubber tyre dissipates electrostatic charges – resistance $\leq 10^9 \Omega$
- Wheel is made by fitting tyre around steel core with ball bearing bore & threadguards
- Wheels assembled in zinc-plated, double ball race brackets and fixed (rigid) brackets
- Top plate and bolt hole castors with brakes (stops) that operate on wheel & swivel head (except 50mm-wheel only)
- Manufactured in accordance with **ISO 2175**

Fittings are supplied loose and can be assembled with castor base by hand
