Eye Care

Emergency Eyewash Refills

- Steri-Wash®** emergency eyewash
- Sterile sodium chloride (Ph. Eur. 0.9% w/v)
 - 500 ml suitable for eyewash station, single-metal and double-plastic wall brackets
 - 150 ml ensures portable eyewash is available in a variety of situations
 - 20 ml personal eyewash enables accurate and directable flushing of the eyes

The Steri-Wash® range of products provides you with a highly cost-effective way of ensuring safety for eyes at work and complies fully with the First Aid at Work requirements for eyewash stations which can be used in the office or on the factory floor.

Where mains tap water is not readily available for eye irrigation, sterile water or sterile normal saline (0.9%) in sealed disposable containers should be provided. Each container should hold at least 300 ml and should not be re-used once the sterile seal is broken. At least 1000 ml should be provided.
