

Stand Alone Card Readers

Single Door Access Control System

Recent Addition

This unit offers a higher level of security and usability, not normally associated with similar devices. This is achieved by all database locations being accessible individually to the security manager by means of location cards. Using this facility, cards may be deleted, even when the original cards or copies are not available.

The Multikey kit consists of the following: power supply, Multitkey reader, request to exit button, lock release, all fixing screws, 50 user cards, 50 location cards, connection box.

- Easy to install, programme and use
- External or internal operation
- Up to 1,000 users
- Accepts any ISO track 2 format cards
- LED indication
- RS232 output for connection to a printer or computer if required

Please Note: A pack of location cards is required for every pack of user cards.

SSW724

	Order Code	1+	Price Each	5+
Access Kit	353-9945			
Mag Stripe Cards Pack of 50	353-9957			
Mag Stripe Location Cards Pack of 50	353-9969			

2 Door Controller

BEWATOR

Recent Addition

The BC93 2 door controller has all its electronics housed in one lockable box so it can be mounted on the secure side of the door. On the outside of the door you can then mount the card reader, e.g. a mag stripe reader or a proximity reader on both the inside and outside of the door; this will give the facility to read in and out of the door.

- Up to 2 doors or 1 door in/out
- Up to 2000 cards
- Printer output
- Will take either mag stripe reader BC16 or proximity reader BC5291
- Cards sold individually for either mag stripe or proximity

SSW725

	Order Code	1+	Price Each	3+
BC93 Controller	353-9970			
BC16 Mag Stripe Reader	353-9994			
BC5291 Prox Reader	353-9982			
IB1 Mag Stripe Card	354-0005			
IB938 Prox Card	354-0017			

Single Door Card Reader

BEWATOR

Recent Addition

The BC-615 card reader combines the controller and reader head in the same unit, making for easy installation. All electrical functions and programming are carried out via the keypad. With compact card readers, five security levels can be set; door unlocked, common code, card only, card combined with PIN code, and door locked.

- Backlit keypad
- Printer output
- Door monitoring
- Fully upwards compatible
- Can be networked to a central PC to give a maximum capacity of 8 readers
- 1000 card capacity
- 15 time zones
- Tamper output
- Duress output
- User selectable PIN
- Cards sold individually

Max relay loading	2 amp at 30V dc
Supply voltage	12 – 24V dc or 18 – 24V ac
Power consumption	100 mA quiescent
Dimensions (H x W x D)	160 x 108 x 47

Portrait Blue	354-0133			
Landscape Black	354-0145			
Landscape Red	354-0157			
Landscape Yellow	354-0169			
Landscape Blue	354-0170			

Card Strap Clips

Recent Addition

Two popular designs in card straps. These are designed to loop through either a card holder or slot in the actual access card itself, normally made with a special slot punch, see order code 354-0327. The

straps come in two designs: one with a lever style clip and the other with a crocodile clip on the end of the strap; both have metal poppers.

SSW729

	Order Code	1+	Price Each	10+
Strap Clip Lever Style	354-0182			
Strap Clip Crocodile Style	354-0194			

Neck Chains

Recent Addition

Both these necklaces are suitable for use with RF/ID tags and both have a metal tub connector available in either nickel-plated or white plastic.

Nickel plated	710mm long
White plastic	760mm long
