

Multi-Vac® Variable Suction

L = 220,
Dia = 20

- Designed for combined general purpose, heavy and light duty desoldering
- 3 step plunger to vary the suction during solder removal
- Ideal for use in miniature component removal and for more demanding applications

SOL160

Spare nozzle	7875B	419-047	

Mains Powered Desoldering Guns

Desoldering Iron

L = 260, Weight = 113g

- Electric desolder iron
- Combines ease and portability of hand-held manual desolder pumps with the performance of an industrial desolder station
- Eliminates the need for separate desolder pump and soldering iron
- Vacuum chamber is easily removed for cleaning
- Supplied with a 1.5mm tip

Operating voltage 240V ac

Motorised with Variable Hot Blow Static Dissipative

DENON

H = 190, W = 40, D = 205

- Motorised desoldering gun with variable hot blow facility
- Static dissipative housing is fitted with a low vibration, motorised diaphragm pump
- Value to select suction or variable hot blow
- 100W ceramic element
- Electronic temperature controller adjustable between 350°C and 500°C
- LED to indicate operating temperature
- On/off power switch within hand grip
- Fitted with a 1mm desoldering tip, 1.5m mains lead and 13A plug. Supplied with two replacement filter cartridges and a selection of six tip clean out tools.

Voltage 230V ac 50/60Hz
Pump capacity (open) 15 litres/minute
Power consumption 120W
Temperature range 350°C to 500°C
Weight 420g

Mftrs. List No. SC7000Z = 956-880
