

Sheet Abrasives — continued

Aluminium Oxide Cloth Sheets  
Metalite®

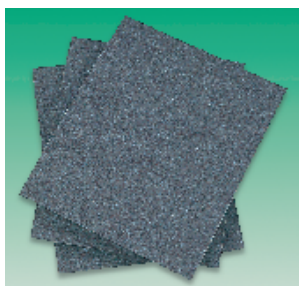

- Tough abrasive sheets with Metalite® coating
- 'J' Cloth backed for improved durability and flexibility
- Closed grain distribution
- Ideal for sanding high tensile materials such as carbon steel
- 3 grit sizes
- Mixed pack available, containing 5 sheets of each grit size

H = 230, W = 280

Silicon Carbide Waterproof Paper  
Durite®

- Tough abrasive sheets with Durite® coating
- Waterproof paper backing
- Able to penetrate and cut paper under light pressure
- Closed grain distribution
- Ideal for sanding non-ferrous metals, plastics
- 8 grit sizes
- Mixed pack available, containing 5 sheets of each grit size

H = 230, W = 280

Aluminium Oxide Cloth Rolls  
Metalite®

- Tough abrasive reel with Metalite® coating
- 'J' Cloth backed for improved durability and flexibility
- Closed grain distribution
- Ideal for sanding ferrous metals and some woods
- 7 grit sizes

Reel length = 25 mtr; Standard W = 25, Large W = 50

Bear-TEX™

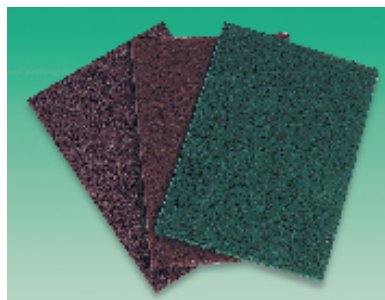

Bear-TEX™ products consist of a non-woven web of nylon, impregnated with an abrasive grain, bonded together by synthetic resins. The resistant cushioned, three dimensional material is extremely pliable and durable.

The products are waterproof and non-metallic and so do not rust and are designed for use where only light stock removal is needed. These products excel as finishing tools. They can be used on a wide range of surfaces including aluminium, copper, stainless steel, ceramics, glass, plastic and wood.

Typical applications include deburring, cleaning, scrubbing, scouring, blending, polishing and finishing.

act243

Bear-TEX™ Hand Pads  
Aluminium Oxide

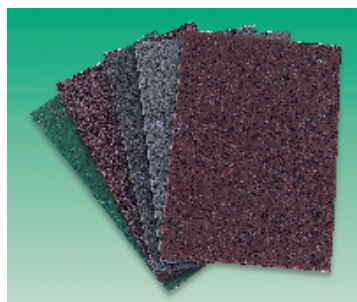

H = 150, W = 230

- Tough abrasive hand pads
- Durable
- Produce little discolouration on aluminium
- More aggressive on hardened steel
- Can be used either wet or dry
- Ideal for cleaning and finishing
