FEATURES

- **Meets or Exceeds the Requirements of IBM® 360/370 Input/Output Interface Specification for 4.5-Mb/s Operation**
- **Single 5-V Supply**
- **Uncommitted Emitter-Follower Output Structure for Party-Line Operation**
- **Driver Output Short-Circuit Protection**
- **Driver Input/Receiver Output Compatible With TTL**
- **Receiver Input Resistance . . . 7.4 kΩ to 20 kΩ**
- **Ratio Specification for Propagation Delay Time, Low to High/High to Low**

DESCRIPTION/ ORDERING INFORMATION

The SN751730 triple line driver/receiver is specifically designed to meet the input/output interface specifications for IBM System 360/370. It also is compatible with standard TTL logic and supply voltage levels.

The low-impedance emitter-follower driver outputs of the SN751730 drive terminated lines, such as coaxial cable or twisted pair. Having the outputs uncommitted allows wired-OR logic to be performed in party-line applications. Output short-circuit protection is provided by an internal clamping network that turns on when the output voltage drops below approximately 2.5 V.

An open line affects the receiver input as does a low-level input voltage.

All the driver inputs and receiver outputs are in conventional TTL configuration and the gating can be used during power-up and power-down sequences to ensure that no noise is introduced to the line by pulling either DE1 or DE2 to a low level.

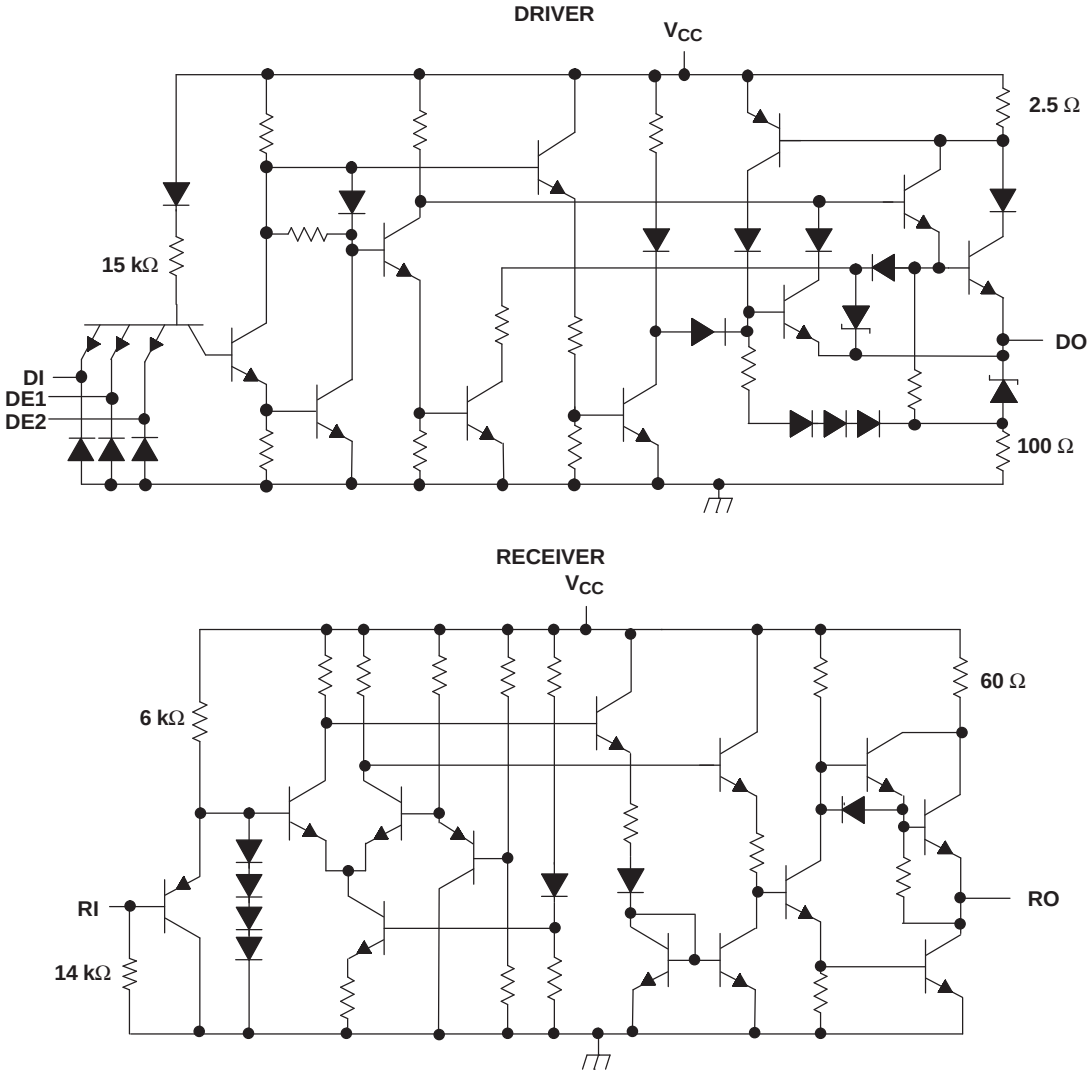
EQUIVALENT SCHEMATICS OF DRIVER AND RECEIVER(1)



(1) All resistor values are nominal.

Absolute Maximum Ratings(1)

over operating free-air temperature range (unless otherwise noted)

			MIN	MAX	UNIT
V_{CC}	Supply voltage(2)			7	V
V_I	Input voltage range	Driver	–0.5	7	V
		Receiver	–0.5	7	V
V_O	Output voltage range	Driver	–0.5	7	V
	Enable input voltage range		–0.5	7	V
θ_{JA}	Package thermal impedance(3)	D package		73	°C/W
		DW package		58	
		N package		67	
		NS package		60	
T_J	Operating virtual junction temperature			150	°C
	Lead temperature 1,6 mm (1/16 inch) from case for 10 s			260	°C
T_{stg}	Storage temperature range		–65	150	°C/W

(1) Stresses beyond those listed under "absolute maximum ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under "recommended operating conditions" is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.
(2) All voltage values are with respect to network ground terminal.
(3) The package thermal impedance is calculated in accordance with JESD 51-7.

Recommended Operating Conditions

			MIN	NOM	MAX	UNIT
V_{CC}	Supply voltage		4.75	5	5.25	V
V_{IH}	High-level input voltage	Driver, Enable	2			V
		Receiver	1.55			
V_{IL}	Low-level input voltage	Driver, Enable			0.8	V
		Receiver			1.15	
T_A	Operating free-air temperature		0		70	°C

DRIVER SECTION

Electrical Characteristics

over recommended ranges of supply voltage and operating free-air temperature (unless otherwise noted)

PARAMETER			TEST CONDITIONS		MIN	MAX	UNIT
V_{IK}	Input clamp voltage		V_{CC} = 4.75 V,	I_{IL} = –18 mA		–1.5	V
V_{OH}	High–level output voltage		V_{CC} = 4.75 V, I_{OH} = –59.3 mA	V_{IH} = 2 V, T_A = 25°C	3.11		V
			V_{CC} = 5.25 V, I_{OH} = - 78.1 mA	V_{IH} = 2 V,		4.1	
			V_{CC} = 4.75 V, R_L = 51.4 Ω	V_{IH} = 2 V,	3.05		
			V_{CC} = 5.25 V, R_L = 56.9 Ω	V_{IH} = 2 V,		4.2	
V_{ODH}	Differential high-level output voltage		R_L = 46.3 Ω or 56.9 Ω			0.5	V
V_{OL}	Low-level output voltage		V_{CC} = 5.25 V, V_{IL} = 0.8 V, V_{IH} = 4.5 V	I_{OL} = –0.24 mA		0.15	V
				R_L = 56.9 Ω		0.15	
I_{IH}	High-level input current	DI	V_{CC} = 5.25 V,	V_{IH} = 2.7 V		20	µA
		DE				60	
I_{IL}	Low-level input current	DI	V_{CC} = 5.25 V,	V_{IH} = 0.4 V		–400	µA
		DE				–1200	
I_{OH}	High-level output current		V_{CC} = 4.75 V, V_{OH} = 5 V	V_{IL} = 0		100	µA
				V_{IH} = 4.5 V		100	
I_{OS}	Short-circuit output current(1)		V_{CC} = 5.25 V	V_{IH} = 4.5 V		–30	mA
I_{CCH}	Supply current (total package)		V_{CC} = 5.25 V, No load	$V_{I(D)}$ = 4.5 V, $V_{I(R)}$ = 0		47	mA
I_{CCL}				$V_{I(D)}$ = 0, $V_{I(R)}$ = 4.5 V		80	

(1) Not more than one output should be shorted at a time, and duration of the short circuit should not exceed one second.

Switching Characteristics

V_{CC} = 5 V + 5%, T_A = 25°C

PARAMETER		TEST CONDITIONS		MIN	TYP	MAX	UNIT
t_{PLH}	Propagation delay time, low- to high-level output	R_L = 47.5 Ω,	See Figure 1	6.5	12	18.5	ns
t_{PHL}	Propagation delay time, high- to low-level output			6.5	12	18.5	ns
Δt_{pd}	Differential propagation delay time(1)					10	ns
t_r	Output rise time	V_{CC} = 5 V, R_L = 47.5 Ω, See Figure 1	V_O = 0.15 V to 3.05 V, C_L = 10.2 pF,	5	10		ns
t_f	Output fall time			5	13		ns
SR	Slew rate	V_O = 1 V to 3 V average, R_L = 47.5 Ω, See Figure 1	C_L = 10.2 pF,			0.65	V/ns

(1) $\Delta t_{pd} = |t_{PLH} - t_{PHL}|$

(1) The marketing status values are defined as follows:
ACTIVE: Product device recommended for new designs.
LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.
NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.
PREVIEW: Device has been announced but is not in production. Samples may or may not be available.
OBSOLETE: TI has discontinued the production of the device.

(2) Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS), Pb-Free (RoHS Exempt), or Green (RoHS & no Sb/Br) - please check http://www.ti.com/productcontent for the latest availability information and additional product content details.
TBD: The Pb-Free/Green conversion plan has not been defined.
Pb-Free (RoHS): TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes.
Pb-Free (RoHS Exempt): This component has a RoHS exemption for either 1) lead-based flip-chip solder bumps used between the die and package, or 2) lead-based die adhesive used between the die and leadframe. The component is otherwise considered Pb-Free (RoHS compatible) as defined above.
Green (RoHS & no Sb/Br): TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material)

(3) MSL, Peak Temp. -- The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

NOTES:
A. All linear dimensions are in millimeters.
B. This drawing is subject to change without notice.
C. Refer to IPC7351 for alternate board design.
D. Laser cutting apertures with trapezoidal walls and also rounding corners will offer better paste release. Customers should contact their board assembly site for stencil design recommendations. Refer to IPC–7525
E. Customers should contact their board fabrication site for solder mask tolerances between and around signal pads.

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

TI products are not authorized for use in safety-critical applications (such as life support) where a failure of the TI product would reasonably be expected to cause severe personal injury or death, unless officers of the parties have executed an agreement specifically governing such use. Buyers represent that they have all necessary expertise in the safety and regulatory ramifications of their applications, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of TI products in such safety-critical applications, notwithstanding any applications-related information or support that may be provided by TI. Further, Buyers must fully indemnify TI and its representatives against any damages arising out of the use of TI products in such safety-critical applications.

TI products are neither designed nor intended for use in military/aerospace applications or environments unless the TI products are specifically designated by TI as military-grade or "enhanced plastic." Only products designated by TI as military-grade meet military specifications. Buyers acknowledge and agree that any such use of TI products which TI has not designated as military-grade is solely at the Buyer's risk, and that they are solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI products are neither designed nor intended for use in automotive applications or environments unless the specific TI products are designated by TI as compliant with ISO/TS 16949 requirements. Buyers acknowledge and agree that, if they use any non-designated products in automotive applications, TI will not be responsible for any failure to meet such requirements.
