

Portable Food Thermometer in Waterproof case

- Supplied complete with general purpose food probe
- High accuracy, designed to comply with food regulations
- Waterproof case and keyboard protects meter circuit against damage
- Choice of additional probes for specific applications

This is a proper 'full sized' food thermometer designed to be used on a daily basis in busy kitchen environments. Housed in a compact and waterproof case, this portable food thermometer offers a combination of high accuracy, ease of use and competitive price. Within the price is a general-purpose food probe with 1m cable, which can be used for between pack, penetration, air and liquid measurements.
