## What does it do?

This product is a bundle containing a selection of E-blocks development boards as well as a professional version of Flowcode graphical development software.

## Benefits

- Facilitates rapid development of PICmicro based projects
- Includes all resources needed for development

## Features

- Ideal for rapid project development
- Includes Flowcode 3 professional
- Includes fast USB PICmicro programmer
- Includes a selection of E-blocks boards

## Description

This bundle consists of a copy of Flowcode 3, a USB PICmicro microcontroller multiprogrammer, an LED E-block (8 LEDs), a switch E-block (8 switches), an LCD E-block (2 line 16 character) a USB cable, and power supply.

This solution is perfect for low cost entry into PICmicro development and is great for students who want to continue their studies at home, and for engineers who need to develop prototypes of electronic systems quickly. The pack is supplied with a PIC16F88 device and a spare 16F877A chip, and is fully compatible with the range of E-blocks accessories. The retail price of this pack is at a significant discount to the sum of the individual parts. Datasheets on each individual item are available separately.
