

DP1000 **Portable or Desktop Impact Printer**

Maxatec
portable printers

The compact and lightweight design makes this printer an ideal choice where footprint is at a premium or portability is required by the user

Advantages

- Small & Compact
- Easy Paper Loading
- Battery or Mains Operated
- RS232C
- Graphics Capabilities

Portable & Desktop Applications

The DP1000 Series is a range of battery powered, portable impact printers which can be used for receipt or ticket printing.

The compact and lightweight design makes this printer an ideal choice where footprint is at a premium or portability is required by the user.

The DP1000 is available with a choice of mechanisms providing from 24 to 40 characters per line, at speeds of up to 2.5 lines per second on standard 58mm width paper.

The batteries provide continuous printing for 1 hour from a full charge or the printer can be permanently charged by leaving the optional charger connected to the mains.

Communications are via a standard RS232C interface, and interface parameters can be set externally using front panel switches.

DP1000 Portable or Desktop Impact Printer

Compact

105mm (W) x 195mm (D) x 90mm (H)
