

Storm AXS SECURE KEYPADS FOR ACCESS CONTROL

STORM AXS Keypads provide rapid and reliable access control in "high-traffic" applications. Constructed to withstand hard use and abuse, the keypads can be fitted in exposed unsupervised locations. Available in both "vandal resistant" and robust specifications, complying with current and forthcoming mandatory standards, **STORM AXS Keypads** are ideal for use in all indoor and outdoor installations.

STRIKE MASTER™ Secure, self contained keypad and controller for electrically operated door locks and strikes.

Authorised personnel use their PIN code to open either one or two normally locked doors. Up to 50 different 4, 5 or 6 digit codes can be individually programmed. Each code can be set to trigger an electric lock or strike for a pre-set time (allowing just one person to access); or to "latch" the door in an unlocked condition (requiring the code to be re-entered to "unlatch" or re-lock the door). If the **Strike Master Keypad** is used to control a single door, the "forced door alarm", "anti-tamper alarm" and "duress alarm" features can be enabled.

- ◆ Up to 50 user programmable PIN codes
- ◆ 4, 5 or 6 digit PIN codes
- ◆ Indexing permits the secure allocation and re-allocation of PIN codes
- ◆ One or two door control
- ◆ Operational life >4 Million cycles per key
- ◆ Forced door, anti-tamper and duress alarms
- ◆ Timed strike or latching door operation
- ◆ Fail (open) Fail (closed) option
- ◆ Timed lock out for repeated invalid code input
- ◆ Remote exit switch facility
- ◆ Disguised PIN code feature
- ◆ All weather resistant (both Anti-vandal and robust models)
- ◆ LED and audible tone status indication
- ◆ Requires 11 to 28V DC or 9 to 20V AC supply
- ◆ Quick and easy to install

CODE MASTER™

Converts codes entered via the keypad into industry standard (26 & 32 bit Weigand) data. Suitable for use as a replacement for (or in conjunction with) most standard card readers.

Part No.	Array	Description	One Piece Price

DEPS010	Power Supply 240V / 12V	\$49.90

Storm AXS-COM INTERCOM FOR ACCESS CONTROL

NEW
TO BE LAUNCHED
IN 1998

STORM AXS-COM Intercom for Access Control is a secure, self contained, two way voice communication system, allowing conversations to take place between a visitor (held outside a locked door) and a person situated within a secured building (receptionist). After talking with the visitor and establishing his/her credentials, the receptionist can, by pressing a remote release switch, unlock the door, giving the visitor access to the building. The **AXS-COM** can be used as a stand alone system, or in conjunction with **STORM AXS Access Control Keypads**. There are two versions of **AXS-COM**, one providing communication between a visitor and a single station within the building, the other providing communications between a visitor and up to four stations within the building (i.e. Reception, Goods In, Trade Desk, Night Security etc.). Each **AXS-COM** is supplied complete with one receptionist's hand set incorporating a remote release switch. Additional handsets can be ordered as required.

- ◆ Tough, weather resistant and vandal resistant construction
- ◆ Clear, two way voice communication
- ◆ Anti-tamper alarm output
- ◆ Door bell / Call buttons(s)
- ◆ Quick and easy installation
- ◆ 1 - 4 Station communication
- ◆ Can be used to control the Electric Door Strike
- ◆ Can be used in conjunction with Power Supply

Part No.	Description	One Piece Price
IC01020	Single Station Intercom	\$132.00
IC04020	Four Station Intercom	\$165.00
HS00010	Additional Handset	\$28.00

Storm AXS ELECTRIC STRIKE

STORM AXS Electric Strikes operate in conjunction with deadlatches and offer remote traffic control. A jaw strength of 907kg (2000lbs) is achieved by a stainless steel blocking mechanism. The strike is controlled by the **STORM Strike Master Keypad**.

STORM AXS Electric Strikes have flat faceplates for mounting in the frame of single action single leaf doors.

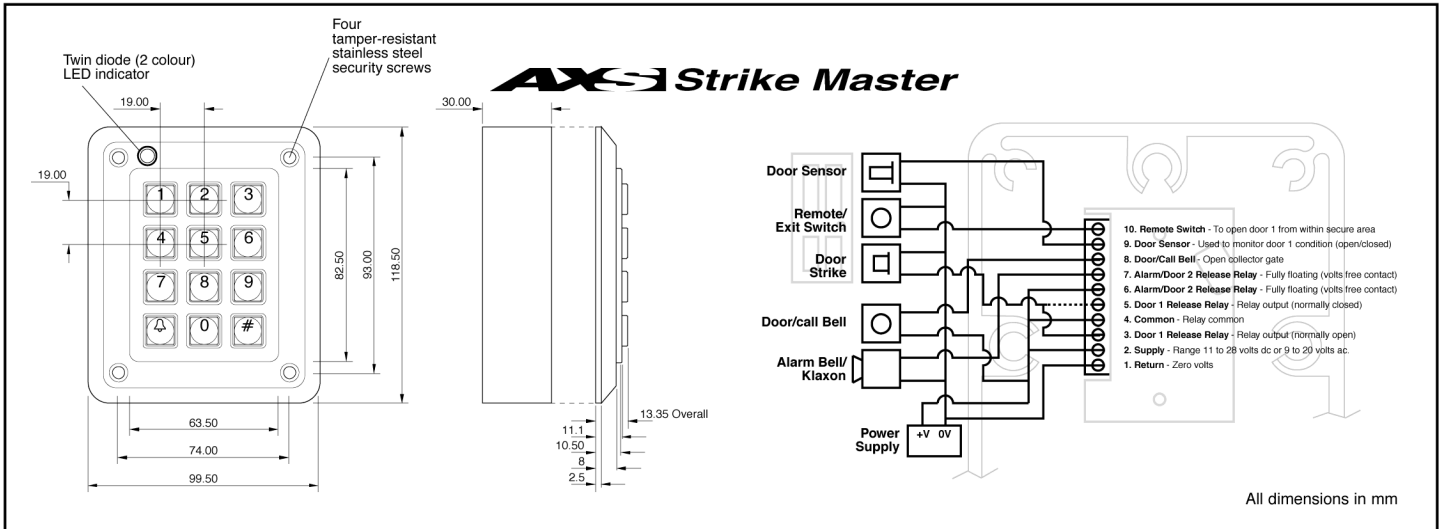

- ◆ UL listed for burglary resistance
- ◆ Tested to 1,000,000 cycles
- ◆ Latch throw: 12.7mm (0.5")
- ◆ Faceplates for both timber frames and aluminium / steel frames included

Faceplates for timber or aluminium / steel frames included

Part No.	Description	One Piece Price
DEST020	Electric Strike 24V DC	\$129.90
DEST010	Electric Strike 12V DC	\$129.90

Resistance to Static Discharge	> 12.5 KV

All **STORM AXS Keypads** incorporate the proven **STORM** switching technology ensuring rapid, reliable and responsive data entry. Specified to survive in different service environments, ranging from exposed, unsupervised public environments to general service / indoor installations. Keypads in the **STORM AXS** range are dimensionally and electrically interchangeable. This allows users, entering codes at all outdoor or indoor access points, to establish and maintain familiarity with the keypad features.

Whilst every effort is made to ensure details are correct at time of production, specifications are subject to change without notice.

STORM, AXS, STRIKE MASTER & CODE MASTER ARE TRADEMARKS OF KEYMAT TECHNOLOGY LTD.

Front mounted **Privacy Shroud** for use with **STORM K Range** and **AXS Keypads**. The **Privacy Shroud** provides added security for financial transactions, access control or other applications where the **PIN** or **Entry Code** should be protected against observation or surveillance. The **Privacy Shroud** locates onto the four keypad fixing positions making installation quick and easy. The **STORM Privacy Shroud** is intended for use with **STORM AXS** keypads for access control and **STORM K Range** 12-key keypads. (To achieve higher level PIN Code security when using **STORM AXS StrikeMaster** keypads, the 'hidden entry code' feature can also be utilised.).

Fixing Instructions

Important Note

- i) **For retrospective installations.** Please ensure that the security fixings (currently locating the Keypad into position) are removed before applying the sealing gasket.
- ii) **For new installations.** Where the **Privacy Shroud** is to be used in conjunction with the wall mounted keypad and rear case, follow the installation instructions supplied with the keypad or rear case, however, do not fit the security screws until the **Privacy Shroud** is in position.

1. Secure the self adhesive **sealing gasket (A)** to the front surface of the **STORM Keypad**. Please take care to ensure that the 'Knock Out' for the LED is removed, where appropriate.
2. Locate the **Privacy Shroud** to the front surface of the Keypad and secure using the **four security fixings (B)**.
Important: please ensure that the nylon sealing washer is located beneath the head of the **security screw (B)**. A security bit is provided for tightening these screws.
