

Straight Shank Metric

- A range of HSS hand reamers to finish pre-drilled holes to an H7 tolerance
- The reamers have a 2° taper lead for 1.5 times diameter in length to provide an easy cutting start and an improved finish
- For use after an opening drill of 0.5mm / 1/64" diameter smaller than the reamer diameter
- Used as a general-purpose reamer for all types of materials
